Ecological Modelling 101 (1997) 377–378

ELSEVIER

ECOLOGICAL MODELLING

Contents of *Ecological Modelling*, Vol. 101

VOL. 101 NO. 1 — 1 AUGUST 1997

Multivariate aspects of model uncertainty analysis: tools for sensitivity analysis and calibration
O. Klepper (BA Bilthoven, The Netherlands) 1
Simulations of the predator–prey interactions in a two species ecotoxicological test system
J.A. Axelsen (Silkeborg, Denmark), N. Holst (Copenhagen Ø, Denmark), T. Hamers (BA Bilthoven, Netherlands) and P.H. Krogh (Silkeborg, Denmark) 15
Mathematical and statistical formulation of an ecological model with applications
J.L. Usó-Domènech, J. Mateu and J.A. Lopez (Castellón, Spain) 27
A Markov chain Monte Carlo method for estimation and assimilation into models
R. Harmon and P. Challenor (Southampton, UK) 41
Modeling nitrogen saturation in forest ecosystems in response to land use and atmospheric deposition
J.D. Aber, S.V. Ollinger (Durham, NH, USA) and C.T. Driscoll (Syracuse, NY, USA) 61
Climate, vegetation, and global carbon cycle: the simplest zero-dimensional model
Y.M. Svirezhev and W. von Bloh (Potsdam, Germany) 79
Application of a polychlorinated biphenyls bioaccumulation model to Lake Ontario lake trout
G.K. Luk (Toronto, Ontario, Canada) and F. Brockway (Thornhill, Ontario, Canada) 97
An artificial life approach to host-parasite interactions
P.G. Wilber and H.D. Shapiro (Albuquerque, New Mexico, USA) 113
Modelling the depletion and conservation of resources: Effects of two interacting populations
B. Dubey (Assam, India) 123

Publisher's acknowledgement 137

VOL. 101 NOS. 2,3 — 15 AUGUST 1997

A spatial habitat model for the marsh-breeding red-winged blackbird (*Agelaius phoeniceus* L.) in coastal Lake Erie wetlands
U. Özesmi and W.J. Mitsch (Columbus OH, USA) 139
The effect of functional response on stability of a grazer population on a landscape
A. Basset (Cagliari, Italy), D.L. DeAngelis and J.E. Diffendorfer (Coral Gables, FL, USA) 153
Modeling small-scale spatial interaction of shortgrass prairie species
R.M. Reich, C.D. Bonham and K.L. Metzger (CO, USA) 163
The frequency response method used in modelling environmental systems: a working example
L. Dedík, M. Ďurišová and Ľ. Ághová (Bratislava, Slovak Republic) 175
A differential equation model of the interaction between the migration of the Senegalese grasshopper, *Oedaleus senegalensis*, its predators, and a seasonal habitat
J. Holt and J. Colvin (Kent, UK) 185
Hydrodynamic and water quality modelling: An experience
R. Rajar and M. Cetina (Ljubljana, Slovenia) 195
Hydrodynamic and water quality modelling: case studies
R. Rajar, M. Cetina and A. Sirca (Ljubljana, Slovenia) 209
Testing different sub-models for the partition coefficient and the retention rate for radiocesium in lake ecosystem modelling
L. Håkanson (Uppsala, Sweden) 229
A continuous climate-vegetation classification for use in climate-biosphere studies
V. Brovkin, A. Ganopolski and Y. Svirezhev (Potsdam, Germany) 251
Modelling the radiative transfer in discontinuous canopies of asymmetric crowns. I. Model structure and algorithms
A. Cescatti (Bondone, Italy) 263
Modelling the radiative transfer in discontinuous canopies of asymmetric crowns. II. Model testing and application in a Norway spruce stand
A. Cescatti (Bondone, Italy) 275
Modelling hydrography and algal production in a poll in western Norway
K.B. Ulvestad and Ø. Strand (Bergen, Norway) 285
Monthly snowmelt modelling for large-scale climate change studies using the degree day approach
A. Semádeni-Davies (Lund, Sweden) 303

A patch-based spatial modeling approach: conceptual framework and simulation scheme
J. Wu (Phoenix, AZ, USA) and S.A. Levin (Princeton, NJ, USA) 325
A comparison of six models predicting vegetation response to hydrological habitat change
H. Olde Venterink and M.J. Wassen (TC Utrecht, The Netherlands) 347
Environmental and soil-plant parameters for modelling actual crop evapotranspiration under water stress conditions
G. Rana (Bari, Italy), N. Katerji (Thiverval-Grignon, France) and M. Mastrorilli (Bari, Italy) 363
